Sommerfield & Mayer,

Service Garage, Stony Plain

### Accident on Highway.

While motoring to her home at Kapasswin Beach, from Stony Plain, last Thursday night Mrs. Davies had the misfortune to have a collision with another car coming east opposite the Jas. M. Mayer farm on the Highway. Mrs. Davies' car was pretty badly damaged, having the front wheel knocked from under.

The two young men who are said to have been in the running car at the time no doubt immediately went for help, as it is reported they could not be found when an investigation into the cause of the accident was made. A wrecking car from an Edmonton establishment came out at 5 o'clock the next morning and hauled the deserted car in to the City. Mrs. Davies' car was towed to Stony.

A young man's cap was picked up on Friday morning at the scene of the accident. The owner may obtain same at The Sun office.

### Heard on the Golf Links.

"My wife says if I don't chuck golf she'll leave me."  
"Hard luck, old chap."  
"Yes, I'll miss her."

### Bus Time Table.

Stops at Royal Cafe.  
To Edmonton, 9.40  
To Evansburg, 17.45

### Railway Time Table

Going West—Every midnight at 24.10.  
Going East—Every morning at 6.10.

### Calendar

JULY—  
7—Town Council meets  
8—U.F.A. Picnic at Brightbank  
13—Women's Institute meets  
18—M. M. Mecklenburg at Stony Plain  
22—Brightbank Athletic Club's Picnic and Dance.  
31—Concordia Lyric Quartette's concert.

### Sparkie Says.

I realise now why the nice young girls are nice to a nice young man who has a nice new car.

I think nearly everyone knows the saxophone was invented by Adolf Sax, but no one seems to know why.

### Why?

A symposium was recently held in certain schools in the East on the question "Why do children lie?"

The most revealing and most deeply scientific answer was, says The Christian Register, "In order to get along with adults."

### Church Services.

On Sunday July 10th His Excellency Archbishop O'Leary will administer Confirmation at St. Philip's Church at 10 a.m.

German Lutheran services will be held in Stony Plain next Sunday at 10.30 a.m.

Services in St. Philip's Church next Sunday, 11.00 a.m.

United Church service every Sunday Eve. at 7.30.

On Sunday July 17 there will be Lutheran services at St. Matthew Schoolhouse at 7.30 p.m., by Rev. H. Kuring.

Lecture on "Christian Fundamentals" by Pastor Kuring, at St. Matthew Schoolhouse No. 2, July 13, at 8 p.m.

### Prizewinners at Public School

Following are the names of the prize winners in the annual competition, at the local public school:

Gr. 1, Dorothy Ulmer  
Gr. 2, Edwin Litke  
Gr. 3, Thelma Larson  
Gr. 4, Harry Miller  
Gr. 5, Emelia Getsinger  
Gr. 6, Geo. Michael  
Gr. 7, Agnes Lauxman

Prizes given 1 to 7 were for the best progress made by the pupil during the year; each pupil receiving a book.

The prize awarded in Gr. 8 went to Miss Vera Peters. The prize given in this grade was for the best essay on: "Why I am glad I am a Canadian; and was donated by the Women's Institute. This prize was a photo album.

### Drive in Safety.

The number of motor accidents and fatalities recorded in the City dailies this year is rather startling. One of the latest reported was on the Highway near Wabamun, and is said to have been due to reckless driving. This should serve as an example to all. These accidents don't all happen on greasy, muddy roads, some having happened when the highways were in perfect condition. Let us remember the old saying: "The more haste, the less speed."

### The New U.F.A. Co-operative

The final plans for advancing the work of the newly-formed U. F. A. Central Co-operative Ass'n were dealt with at a meeting of the U. F. Executive in Edmonton last week. For the past year the U.F.A. has been purchasing staple farm supplies for its members, these including fuel, oil and greases, binder twine, fence posts etc., while gasoline recently was added to the list. The new scheme provides for the province being divided into districts. Some 9 of these already have been organised, each with its own board.

### Muir Lake Community.

The Community picnic on the holiday was the biggest and most successful held so far by Muir Lagers. Everything run smoothly, and the winners of the different contests were highly pleased with the prizes they received. The dance in the evening drew a good sized crowd, in spite of the many counter attractions elsewhere.

Mr Herb Wolfe was down from Alberta Beach for the Community picnic on Friday, returning to his position at night.

The funeral took place on Wednesday last of the late John Winkelman. The remains were interred in the Heatherdown cemetery, the funeral service being conducted by Rev Father Rooney. Mr Winkelman came to this country from Germany in 1928. Mrs Chas Poemerl was a sister of deceased.

## Get It at HARDWICK'S.

We have the Smartest of Ladies' Hats at the Hardwick Prices, \$1.95 and \$2.95.

Out-of-Doors Ladies' Dresses at 79c., 98c. and \$1.25.

## The 40th Anniversary of

# "SALADA" TEA

**For 40 years SALADA has given the finest quality in tea. Present prices are the lowest in 15 years.**

## How About A Community Survey?

The more favorable weather conditions prevailing throughout the prairie provinces this year as contrasted with the previous three years, and the more encouraging prospects for an average or even better than average crop this year, have had the result of restoring confidence to hundreds of people who make their homes in purely rural districts and in the towns and villages which exist solely because of the agricultural activities in the districts of which they are the centre. True, there is a little ready cash yet available, but hope has been renewed that the farming community of Western Canada has brighter days ahead. The acute discouragement of 1931 is passing, and people are again thinking and planning for the future.

Now is the time to think and plan. There are many little things to do that will mean much to community betterment, and to the betterment and improvement of the individual farmstead, but which were neglected in former years, frequently on the plea that people were too busy to attend to them. That plea does not hold good at present; people in our towns and villages are not so busy at present that they cannot afford to give some time and effort to community affairs; that is, things which call for the giving of some time and effort but which do not call for the expenditure of money, but in the doing of which valuable community assets can be created.

Before we all get so busy with our own affairs again that we feel we have no time for matters of general public concern, would it not be a good idea to make a survey of the "home" town or village, or community centre in strictly rural areas, with a view to effecting some improvement? For example, and without limiting the generality of the whole subject, as the law makers say, what is the present state of the school grounds? Have any trees, shrubs, or flowers been planted? If so, has cultivation been maintained, or has the work of the past been neglected and the grounds become overgrown with weeds? Is the school an eyesore in the district, the reverse of an inspiration to the children? Perhaps a little paint is needed, or an odd piece of carpentry. If so, why not organize a community "bee" and put matters right and make the school a place of community pride? A little time and effort by all making a small contribution of a few hours, will work wonders.

And now about the local cemetery where the pioneers of the community and the loved ones from many a home are sleeping? It reflects the spirit of a community. Is it kept trim, and neat and green, with trees and shrubs keeping off the blistering glare of a hot summer sun, and a few beds of flowers to testify that those friends and loved ones have passed on they are not forgotten? Or is it woefully neglected, a tangle of weeds, a place one shuns to visit, and so desolate that every time a burial takes place, the sorrow and regret of relatives and friends is increased by the thought that the remains of the dear departed one are left in such a place? Travelling over prairie many such desolate spots are to be noted. Why not devote a few otherwise idle hours to changing the whole aspect of these sacred spots for the better? Let some public-spirited person organize their community to do the work on a purely voluntary basis.

And that soldiers' memorial to which in the early years following the war everybody was prone to contribute. It is erected, not as a reminder of war, but as a loving tribute and lasting memorial to those of the community who were the victims of war. If it were merely a memorial to war, it would be well to forget it and let it fall into decay. But it is a memorial to our best and bravest who made the supreme sacrifice for us. Is that memorial more beautiful today than when first created? Are there trees and shrubs, green lawns and flowers, all about it, and are they kept neat and well cared for? While the answer may be, it will likewise indicate the ideals, the sentiments, the public-spiritiveness of the community of today.

Do you reside in the treeless, level prairie country, and, if so, has your community united to transform a small section of prairie into a community park? There is lots of land available, seeds and seedlings can be obtained for very little, and frequently without any outlay of money. All that is required to make a start is the voluntary effort of the public-spirited people of a community, and the contribution of some time and effort by them. And in these days, apart from the pleasure thus provided for your own people, such a little beauty spot or small park will advertise your community far and wide—it is by such an enterprise it will be remembered when travellers have long forgotten how many grain elevators or garages your town or village can boast.

Finally, the individual farmstead. Does the home still stand stark and bare on the bald prairie as it did ten or twenty years ago when you first homesteaded? Or are you living in one of those spots which are a delight to every traveller along our highways—a farm home surrounded by trees and hedges, with a bit of lawn, and a garden, small though it may be? The money cost to effect a truly marvellous change is not large; it means to have the necessary ambition and to expend a little time and effort. Yet the dollars and cents value of trees and hedges about the farm home is very great indeed. Try to sell a farm without a tree in competition with one that possesses such an asset and the truth of the statement will be demonstrated.

Many of our western towns, villages and farms, which were once hopelessly unattractive places ten and twenty years ago are today places which can boast of much beauty solely as the result of organized and persistent tree, shrub, grass and flower planting campaigns. With the breaking of the drought period of the last few years, now is the time for individuals and communities who have overlooked or neglected the value of such work in the past to begin. Give nature a chance and in the long run she will reward your efforts. Planting, cultivating and watching a grove of trees grow is a cure for pessimism and discouragement; it is a joy in the present and a harbinger of hope for the future.

## Troubled With Her Children Having Summer Complaint

Mrs. J. E. Montgomery, Ave. K. South, Saskatoon, Sask., writes: "I am the mother of two children and have a great deal of trouble with them having summer complaint, in fact, several times every summer they are subject to attacks."

"I have found Dr. Fowler's Extract of Wild Strawberry to be the most effective remedy and keep it always handy and give it immediately on the first sign of any bowel complaint."

"Thank to Dr. Fowler's I no longer dread the Summer months."

## Convicts Rescued At Sea

Nine Members Of French Penal Colony At Devil's Island Picked Up By British Boat

Menaced by sharks as they drifted for five days in a waterlogged open boat on the Caribbean Sea, nine survivors of a dash for liberty from the French penal colony of Devil's Island were rescued by the British coastal steamer "Tarpion."

The men, after escaping from their island prison, which lies off French Guiana, attempted to reach sanctuary in Venezuela on the northwest. Storms at sea stripped the sail from their frail craft and filled it with water.

They told a dramatic story of the death of a comrade whose last words were "bury me ashore. Don't give me up to the sharks. I shall never see my friends again, but they will see my grave." Lured by the dead body, sharks sped after the boat, but the exhausted fellows succeeded in landing on the Pomeroy beach in British territory. There they buried their comrade in a shallow and grave.

When they put to sea again, a tempest threatened their craft. They waved their shirts as signals, and the "Tarpion" responded as the men were losing hope.

Use Miller's Worm Powders and the battle against worms is won. The powders correct the horrible conditions of the stomach which nourish worms, and these destructive parasites cannot survive in the healthy conditions of the stomach which Miller's Worm Powders create. The worms are speedily evacuated with other ailments. The howls of Soundness is imparted to the organs and the health of the child steadily improves.

## Trying New System

Vegetables Will Admit Farmers To London Fair This Year

Farmers may say it with vegetables when they arrive at the gates of Western Fair in London, next September. The Fair Board are to consider a suggestion enthusiastically backed up by the relief department that all farmers complete their change for a load of foodstuffs. To avoid a congestion, a central warehouse is proposed where vegetables will be received weeks in advance and admission tickets issued.

Last winter the city relief department experienced great difficulty in collecting sufficient vegetables, and it is hoped that this system will solve the problem this year. It is estimated sometimes as many as 40,000 farmers attend the fair in a single day.

Persian Balm—the delight of dainty femininity. Imparts a fragrant charm to the complexion. Tones up the skin and makes it velvety soft in texture. Cooling, refreshing, it is delightful to use. Never leaves a vestige of stickiness. Invaluable for hands, face, and as a hair fixative. Wonderfully soothing and protective. Especially recommended in cases of roughness, chafing caused by weather conditions.

## Willing To Pay

Consumer Will Give More For Best Quality Produce

There is a contention that the consumer is prepared, usually, to pay a premium for a higher quality, and a more attractively packed farm product. This thought was exemplified lately on the Toronto wholesale markets when the prices of 11-quart baskets of Ontario green asparagus ranged from \$1.00 to \$1.50. From the ready acceptance of the \$1.50 baskets, it is apparent that buyers were willing to pay the higher price when receiving inherently better quality, and a more attractive pack.

Muscular Rheumatism Subdued.—When one is a sufferer from muscular rheumatism he cannot do better than to have the region rubbed with Dr. Thompson's Electric Oil. Let the rubbing be brisk and continue until ease is secured. There is more virtue in a bottle of it than can be fully stated.

Distribution of electric refrigerators in Canada has reached a new high peak. Winnipeg, with its low cost power, is one of the best markets in America for refrigerators and other electrical products.

A new oil well in the southern part of the Turner Valley, Alberta, is reported to have struck a flow of gas estimated at 32,000 cubic feet daily.

## Shall Our Monetary System Be Changed

An Analysis Of Several Of The Proposals Made By Major Strang

The following in brief, are some of the important proposals that have been made for change in our monetary system:

(1) That the weight of gold in the Canadian dollar be reduced from 26 grains to about 12 grains.

This would reduce all internal debts, and those owing abroad payable in Canadian currency, by about 50 per cent. It would enable those who borrowed during the war years to repay with commodities and goods approximately the same value as when they borrowed. It would, however, increase the price of all imported foreign goods 100 per cent, or automatically impose an additional 100 per cent. tariff on all imported goods and commodities imported into Canada. Those who loaned money to repay with commodities would be repaid about one-half of the value which they loaned. Those who borrowed money or purchased property during the last two years would automatically have the value of that money or property doubled. All those receiving wages or salaries would suffer great hardships until readjustments took place because the price of everything they had to buy would quickly rise to double.

Apart, however, from the virtual Canada with its own debts by half there would be put little permanent advantage because the price of all goods, food, fuel, and of wages and salaries, would eventually rise by the same percentage as the gold content of the dollar was decreased.

(NOTE.—This is simply inflation of currency—France, Germany and other countries after the war tried it but after that it was impossible to control. Inflation seems to be difficult to stop once it has started. When inflation is once started it is capable of stating where the inflation shall stop? and particularly who is to stop it?—once it has begun? Inflation seems always to lead in the end to currency becoming practically worthless.)

(2) That the Canadian dollar shall be depreciated in value to the present level of the British pound (12.50) from 26 to about 20 grains of gold (that it shall be tied to the pound sterling).

(NOTE.—This is a mild form of proposal No. 1 above. How the currency of an independent country like Canada with its own control over its budget, income and expenditures, could be expected to fluctuate exactly with the British pound is not stated. In any case would Canadians desire the value of their currency to depend solely upon the action of the British House of Commons and of the British people and not upon their own actions?)

(3) That the Canadian dollar shall be increased in value to that of the U.S. dollar as quickly as possible and tied to the full gold standard of the U.S. dollar, and that by law all debts owing shall be reduced by half and that the Government shall establish the proper relationship of prices for rents, wages—salaries—goods—retail and wholesale, of professional services, etc., or, in fact, shall regulate by law everything excepting money.

(NOTE.—This is financial and economic chaos, pure and simple, and is now actually being tried by Germany and is in fact the deflation of the currency and the price of all things going down to the value of the money of the inflation of the currency up to the debts and prices of all else as is proposed in Nos. 1 and 2. If a low general price level of commodities continues long enough, of course, this state of affairs is automatically gradually brought about for the reason that many debts would not be possible of repayment, and so would be either written down or cancelled by bankruptcy or by private arrangement, and so wages, and salaries eventually would have to decline to a parity with commodity prices.)

(4) That by international arrangement all countries should agree to reduce the backing of their official notes and paper currency by a definitely agreed upon percentage. This would result in a quick rise in the price of all commodities, then the price of all goods, services, wages, and salaries, would soon follow and an even faster rise in time, would be established. The only real effect of this would be the reduction of all debts of individuals, national and international.

This would allow a greater backing of gold behind notes and currencies than the 40 per cent, which is the maximum amount of gold available for monetary purposes in the world today seems to allow. This larger percentage of backing would consequently diminish the possibility of a country, which, whilst solvent, might be in danger of being drained of gold, as England was recently.

(NOTE.—The great difficulty of getting many nations to agree either with the principle involved or of the amount of the gold reduction, might be almost insurmountable, although the most favored of the most favored of all proposals involving inflation by the majority of economists as a means of raising the price level of commodities and of overcoming what

IF YOU CAN'T NURSE BABY YOURSELF

Countless thousands of healthy, happy babies have been reared on Eagle Brand during the last seventy years. You will find a full story booklet, "Baby Welfare," full of valuable hints on baby care. Write for it. Use coupon below.

The Borden Co. Limited, Toronto, Ont.  
Customers' Name and No. Free copy of booklet entitled "Baby Welfare."  
Name \_\_\_\_\_  
Address \_\_\_\_\_ C.W. 17

**EAGLE BRAND**  
CONDENSED MILK

is probably the major defect of the gold standard.

(5) This proposal is practically the same as No. 4 above, but with the proviso that 1/31 gold reserves shall be kept in an international reserve bank at some central point—(Geneva has been suggested)—and that the amount of gold behind the world's paper currency shall be raised or lowered periodically in order that the value of the currency will keep step with the world's gold production and with the production, distribution and consumption of goods and commodities.

(NOTE.—This, of course, would be a form of international managed currency with gold as a basis. This would be much more difficult to bring into effect and to manage than proposal No. 4, and so would hardly seem to come within the realm of possibility, at least for the present.)

(NOTE.—The gold referred to in this article is pure gold mixed with one-twelfth alloy in the British sovereign, one-eighth alloy in the U.S. and Canadian dollar or 113 troy grains of pure gold in the sovereign, one-eighth alloy in the U.S. and Canadian dollar. Or it means that the sovereign contains exactly 4.80% as much gold as the dollar.

(To Be Continued.)

Mexico has just placed export duties on alligator skins.

There is  
**NO ODOR**  
from FISH

or from  
Vegetables cooked  
in CANAPAR

Boiled, or steamed, fish comes out soft and solid, swimming in its own juice, when you seal it up in Canapar Cookery Parchment. No fishy odor. No gummy steamer or saucepan to clean out afterwards.

And vegetables are simply delicious. Using Canapar you can cook three or four times as much as with a burner turned low. Canapar acts on them as it does on fish. Retains all the mineral salts and flavor.

Fat and juices from meat won't burn if you line your roasting pan with Canapar. No pan-spraying afterwards.

Canapar only costs 25 cents for a large envelope. You can use each sheet repeatedly because it won't absorb odors. Makes a perfect dish cloth because it is silky, strong, and doesn't spread lint.

**Special Offer**  
CANAPAR is made by the makers of the famous PARASANI Herbs and Spices. In the Green Bay. Most grocers, druggists and department stores have Canapar on sale. Write for a free sample and coupon direct to the makers and we'll give you a new and unique book entitled "LIFE PARFUMING" and your hundred recipes as a bonus for your trouble.

Applied Paper Products, Ltd.,  
Toronto, Ontario.  
Enclosed find 25c for which please send me one full size package of CANAPAR COOKERY PARFUMING and your 100 recipes for "Life Parfuming".

W. N. U. 1949

## Good Progress Being Made In Extraction Of Radium From Great Bear Lake Pitchblende

Investigation into the treatment of the Great Bear Lake pitchblende ore is now being actively carried on by the Ore Testing Division of the Mines Branch, Department of Mines, Ottawa, under Mr. W. B. Timm, Chief of the Division. It is learned that progress is very satisfactory, and remarkable headway has been made considering the nature of the investigation and the small staff available for the work.

After preliminary investigation of all the known processes, Mr. Timm states, work was confined during February and March to one which seemed to be the most adaptable to the treatment of this particular ore. Now, the investigation has progressed from small laboratory scale work to pilot-plant scale, and some six trial runs have given encouraging results. The pilot-plant scale on which work is being conducted is approximately one-tenth the size of an ordinary commercial unit, calculated to give all the data with respect to operation and costs of a full size unit.

Extractions of radium from the ore have been well over 90 per cent, the last test made giving 97-98 per cent. This, however, is on one type of ore and, as the process involves chemical ones, other types may require variations in treatment and may not give such good results. No results, therefore, can be released for publication until all types of ore from the property have been thoroughly tested, and a satisfactory treatment worked out which can be embodied in a commercial treatment plant.

For some years only high grade pitchblende will be shipped from the Great Bear Lake property, i.e., ore containing above 40 per cent, uranium oxide. Later, the cobble treatment worked out which can be embodied in a commercial treatment plant.

Test there has been any misunderstanding as to the meaning of the word concentration when spoken of in the treatment of pitchblende ore for the extraction of radium. It should be pointed out that the concentration of the radium is distinct from the concentration of the pitchblende in the ore. The latter will, no doubt, be done at the mine when it becomes necessary to carry out this operation. The concentration of the radium is that part of the chemical process in which the radium in solution is precipitated with barium, resulting in a radium-barium sulphate concentrate. Those unacquainted with the topography and general characteristics of the Great Bear Lake territory, may be interested to know that the lake itself is the largest one contained entirely within Canadian boundaries, and the fourth largest on the North American continent. Its area, according to present surveys, is 11,663 square miles, compared with 31,810 square miles for Lake Superior, 28,010 for Lake Huron, 25,400 for Lake Michigan, and 11,170 for Great Slave Lake. Its greatest length is 198 miles and its width about 116 miles. Its elevation has not yet been accurately measured, but it is approximately 390 feet above mean sea level. Its depth varies up to 75 fathoms, or 450 feet, placing its floor below sea level.

Chief: "We have forgotten to stamp the letters."  
Boy: "What letters we are?"—Buen Humor, Madrid.

W. N. U. 1949

Great Bear Lake has long been known through the descriptions left by early explorers, particularly Franklin, Dease and Simpson, who made this lake their headquarters in the exploration and mapping of the Arctic Coast, but it is only recently that the area surrounding it has become of economic importance. In 1920, oil was discovered on the Mackenzie River in the vicinity of Norman, where Great Bear River discharges the waters of the lake. The discovery well, and subsequent wells, drilled in 1921 and 1922, were capped and left for development when conditions are economically favourable. The oil has produced, experimentally, a high grade gasoline. In 1923 outcrops of coal were reported to exist at Douglas Bay on Great Bear Lake. From 1926 to 1928 biologists of the Department of the Interior made investigations over a large part of the Northwest Territories in search of grazing lands for reindeer. One of the areas found to be most suitable for the purpose lies immediately north of Great Bear Lake.

### New Source Of Rayon

Discovery Regarding Waste From Sugar Cane Is Important

Sugar cane waste has been turned into a new source of rayon—a silky dress material for women. Chemists have succeeded in developing a process by which high-grade cellulose, the base material for rayon, is produced from bagasse, the waste from sugar cane, after the sugar has been extracted. The discovery is regarded as important as "most rayon manufacturers depend upon wood pulp for the cellulose. Sugar cane mill waste between 250,000 and 500,000 tons of bagasse annually. Much of this material has been used in manufacturing insulating building material. Other quantities have been used as fuel in the mills.

### New Industry In Alberta

Factory Turns Out Potato Chips and Potato Waffles

A new industry has been launched in Lethbridge, Alberta, the output of which will be potato chips and potato waffles. The latest models in machinery are used and the prospects are large quantities of local grown potatoes will find a market. The utmost care is taken in handling the potato chips which will be retailed in attractive, dust-proof containers. If the Lethbridge product proves popular the factory and its products will be extended.

Potato chips are a popular and nutritive food product in the States where similar factories have been established.

### Floral Barometer Is Unique

One In Victoria Park, London, Ontario Is Accurate Under Test

A floral barometer has been laid out in Victoria Park, London, Ont., and under test it worked. It is believed to be unique among flower beds of Canada. It records accurately each day the barometric pressure and forecasts change in weather. It has two floral bands, one stationary, and the other moving. The words "stormy," "rain," "change," "fair and dry," are on the outer edge in contrasting colored plants. The pressure numbers from 26 to 31, inclusive, are also shown in floral design.

### Elk Island Animal Park

Elk Island National Park, Canada's second largest animal reserve, is within an hour's motor ride of Edmonton, Alberta. The buffalo in Elk Island Park are unusually fine specimens of their kind. The pelage is particularly dark and thick and the animals are all sturdy and well developed. They are not as wild as when they were originally captured, but it is inadvisable for visitors to go near them on foot, though they may be approached with safety in an automobile. Both the moose and elk in this sanctuary are also well developed specimens.

FASCINATING PATTERN THAT IS VERSATILE

It does for "Dress-Up" or hardy wear.

Now a dainty pale pink dotted voile inspired the first model. Its darling vee frills with plect-edge and cross-over collar were plain white, its buttons, creating a double-breasted effect were pink pearl. And can't you imagine it in dainty prints, hata prints, dotted swiss and pastel crepe de chine?

Should hardy cottons be your consideration of the moment, then you only have to omit the frills. You may bind the edges. For instance, blue plique or plain gingham delight. The trim with white pearl buttons.

Style No. 492 is designed for small girls of 2, 4 and 6 years. Size 4 requires 2 1/2 yards of 35-inch material with 1/2 yard of 35-inch contrasting. Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

### How To Order Patterns

### Measuring Star's Brightness

With a photo-electric photometer such as the one attached to the telescope at the Dominion Observatory, Department of the Interior, Ottawa, it is possible to measure the brightness of a star to within one half of one per cent. of its value. This instrument is used mainly for following the changes in the brightness of variable stars.

## Anglo-American Alliance

A recent wedding of interest to society on both sides of the Atlantic was that of A. F. Stanley-Clarke, of the 14th and 20th Hussars, crack British regiment, and Miss Vivian St. George, prominent New York society belle. The newly-weds are shown as they left St. Mary Abbot's Church, London, England, after the ceremony. The bride is a sister of the well known New York chateau.

## Riding Mountain National Park, Manitoba's Scenic Playground, Has Attractions For Tourists

### Works In A Circle

Great Trouble Is That Unemployment Creates Unemployment

Gross earnings of Canadian railways for March totalled \$25,000,000, as against \$30,000,000 for March of last year. But as operating expenses in March, 1931, were but \$22,500,000, compared with \$27,500,000 in March, 1930, the net position remained unchanged.

Many may ask how the railways could manage to get along in March of this year with \$5,000,000 less of operating expenditure than in March, 1931. They may think that the railways must have been wasting a lot of money last year, or spending it unnecessarily.

The real facts, perhaps unfortunately, are quite different. In March, 1930, the number of railway employees was 145,007, with a payroll of \$19,000,000. In March, 1931, the number of employees had dropped to 124,000, the payroll declining to \$15,000,000.

Thus, while the railways saved a lot in operating costs, it was at the price of 20,000 railwaymen being dropped from employment, with a monthly loss of \$4,000,000 in purchasing power.

That, the circumstances being what they are, helped the railways. But it wasn't much of a help to Canadian business. The great trouble about unemployment is that it creates unemployment.—OTTAWA JOURNAL.

### Airplane Directed

By Train Passengers

Successful Experiment Conducted From "Flying Scotsman"

Passengers travelling from London to Glasgow on the crack train, "The Flying Scotsman," at a speed of ninety miles an hour directed by radio-phones the movements of a forty-passenger airliner "Hercules" flying overhead.

Pilot O. B. Jones turned the machine whenever requested, while several of his passengers spoke with persons aboard the train.

This is believed to have been the first two-way conversation between an airplane and a train. An aerial was slung inside the observation car, as there was not sufficient clearance on the roof when the train passed under bridges.

### When Time Flies

The advance of age is, at first unperceived, but is nevertheless certain and rapid; and when it is realized it seems to approach almost with speed of light, and life at last seems to end soon after its commencement.

There was a substantial gain in the Prairie Provinces wool clip last year. Alberta clipped 4,554,000 lbs., Saskatchewan, 1,605,000 lbs., and Manitoba, 1,202,000 lbs. Total 7,361,000 lbs.

On a lofty plateau, 2,300 feet above sea level, which forms the summit of Riding Mountain, covered with a luxuriant growth of forest and set with exquisitely clear lakes, lies Manitoba's great scenic playground—Riding Mountain National Park. Hundreds of elk, bear, and moose roam wild within its boundaries; wildfowl and beaver build their homes along its waterways; while a herd of buffalo, descendants of those wild herds which once roamed the prairies of Manitoba, browse on the rich buffalo grass of its uplands. Here, Manitoba found its park ready-made and for years, long before the project of a national park was mooted, it has been the summer playground of people from all parts of the province. Its easy accessibility by rail or highway, and the fact that it lies within a day's ride or less of many of the province's cities and towns, ensure it a maximum of use both by the people of Manitoba and visitors from outside the borders. Now, with adequate conservation and orderly development, it is fast becoming for increasing numbers a delightful playground—a place of rest and refreshment.

One of the greatest charms of the park from the scenic point of view is the number of beautiful little lakes which nestle between the ridges, in hollows made by the ancient glaciers of the Ice Age. They are of all sizes ranging from tiny tarns to splendid bodies of water several miles long. The largest and finest of these is Clear Lake situated near the southern boundary of the park. This lovely sheet of water, nine miles long and varying in width from one mile to two and a half miles, reflects in its limpid waters the hues of both earth and sky. A nine-hole golf course is situated at the eastern end of Clear Lake, with a view to the westward down the whole blue length of its expanse.

Clear Lake is largely fed by springs and its cold waters contain several varieties of fish. Northern pike are the most abundant but whitefish and perch are also found in numbers. Fishing is free under the Park regulations. The open season is from July 1 until September 30, and the limit for each angler is fifteen fish a day with a limit of thirty pounds. The tourist seeking fresh woods and pastures new will find that the park fulfils all the requirements of the ideal vacation, for here is a settled summer community with hotel accommodation, stores, and motor camp ground while many summer cottages front on a lake of sparkling blue water. Here, too, are opportunities for fishing, swimming, tennis and golf, and then just beyond this front an almost virgin land where the elk and bear and moose still roam. Riding Mountain National Park is one of the great sanctuaries of wild and beautiful nature which have been set aside under the Department of the Interior as national parks for the use and enjoyment of the people of Canada and for the stranger within her gates.

### Quality Increases Sales

An increase of over 2,000,000 lbs., representing some 3,525 head of beef cattle, for the first four months of the present year is indicated in the latest issue of the Live Stock and Meat Trade Review prepared by the Markets Intelligence Service of the Dominion Live Stock Branch. Sales for the first four months of 1931 totalled 5,032,395 lbs., while for the corresponding period in 1932 they totalled 7,047,365 lbs.

"My life is always shrieking with pain."  
"Have you no remedy for it?"  
"Rather! I stop my ears with cotton wool!"—Karikatures, Oslo.

WORLD HAPPENINGS  
BRIEFLY TOLD

James W. Douglas, Edmonton, has been appointed stipendiary magistrate for the Northwest Territories.

Lady Eaton of Toronto, back in Canada after an extended visit abroad, told an interviewer in Winnipeg that Canada is doing too much worrying about the depression.

New York motorists paid approximately \$3,000,000 during the past decade to run red lights, talk back to motorcycle cops and drive the wrong direction on one-way streets.

An issue of the Canada Gazette contains a proclamation designating the Waterton Lakes National Park as a part of the Waterton-Glacier International Peace Park.

Canada stands third in the public ownership of railways. India is first, with 41,724 miles of road. Germany second, with 32,400, and Canada, 24,822; including federal, provincial and municipal.

Atlantic salmon eggs are being exchanged with the state of California by Dominion authorities for a corresponding number of steelhead salmon eggs to be used in stocking British Columbia waters.

One hundred years ago in June, 1832, the Dominion of Canada extended the rights of citizenship to the Jews of the country. Jews all over the Dominion celebrated the centenary of emancipation.

The British gunboat "Moorhen" was bombed by mistake by Chinese aeroplanes sent by General Chan Chai-Tong to recover a quantity of munitions captured by Admiral Chan Chak, rebel commander of the Chinese navy, but she was not struck.

Union Drilling Company of Calgary will commence drilling for crude oil in the heart of Alberta's "bad lands" where dinosaurs roamed millions of years ago. Vancouver capital is backing the venture and W. D. Marler, of Vancouver, is heading the company seeking crude oil.

While screening gravel at the Hudson Bay railway yards at Churchill, George McDonald, machinist, found an old coin of the reign of George the Third. The coin is thin, and somewhat worn. The gravel from which the coin was taken, came from the shore of the bay. It is presumed it was lost by a sailor of one of the early expeditions.

## A Perpetual Memorial

Late John Weller Superintendent Work on Welland Ship Canal

John Laing Weller is dead, but the Welland Ship Canal will be a perpetual memorial to his work. Few Canadians were familiar even with the name of the man who was in charge of the construction of the greatest public work ever completed in the Dominion of Canada. Yet it was Mr. Weller who was on the job; it was he who was head of the surveys, designs and carrying out of the big task from 1912 to 1917. When work was resumed in 1919 after the war, it was Mr. Weller who was made consulting engineer. For the last few years he has been on pension from the Federal Government.

There is wide spread interest in the Island Lake district, Manitoba, on the part of mining men in all parts of Canada. Over 680 reports on this district were recently sent out by the Manitoba Chamber of Mines.

## Salvaging Lost Gold

Divers Are Bringing Up Ingots From Sunken Liner

Brest, France.—Thirty ingots of gold, valued at \$1,000,000, were stowed away in the hold of the salvage ship "Artiglio II," as divers, with renewed vigor, dropped into the sea to fish up the rest of the \$5,000,000 which went down with the liner "Egypt" ten years ago.

The \$1,000,000 which was clumped down on the "Artiglio's" decks represents four years of dogged labor against the power of the storms and sea. Two stout ships have been lost in the quest and the lives of 15 seamen.

The tragedy of the past was mirrored in the dramatic scenes on the "Artiglio's" deck when the ingots were brought up. There was a moment of silence in honor of the divers who were killed two years ago in the explosion which destroyed the "Artiglio I."

Paris, France.—The French salvage company, which first discovered the location of the hull of the liner, "Egypt," from which \$1,000,000 has been recovered by the salvage ship "Artiglio II," will claim part of the booty, Captain Jean Davy said in an interview with Paris-Midi, Paris newspaper.

**SLIMMING, GRACEFUL AND YOUTHFUL WITH BECOMINGLY PLACED CAPELET FRILL**

Here's a delightful model, full of charm for summer wear.

A caplet frill covers the sleeveless arms in a modish manner. And don't you think the skirt is smart with its slimming bias hip lines? To make it cut it out and you'll finish it in less time than it would take to shop for one that is as smart as this model.

It is carried out in triple sheer print. Tub slits in white or pastel, voile prints, sheer dotted batiste and sheer linen prints are dainty and cool suggestions.

Style No. 519 is designed for sizes 14, 16, 18, 20 years, 36 and 38 inches bust. Size 16 requires 3½ yards of 38-inch material.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

## Contract Bridge

By Hamlin B. Hatch, Cavendish Club, Toronto

In my previous article the methods of valuing the trick taking probabilities of hands were given. Today I will deal with the application of these principles.

It must be understood that in Contract it is the endeavor of the partnership in any particular deal, to take as precisely and as definitely as possible the story of the twenty-six cards held by the partnership. For this reason, certain basic conventions are necessary and also certain definite formulae for card valuations. Both of these have been outlined in previous articles.

The opening bidder, under ordinary circumstances, opens the bidding when his hand contains three or four high honor cards which, he thinks, under average conditions, will take from two to three tricks in any declaration the adversaries may make. Also the opening bidder guarantees, that, in case he and his partner are the declarers the bidding hand will take as a minimum, from four to five tricks, if the deal is played in the original declaration made. That therefore there are nine tricks left for the three remaining hands, and that the opening bidder expects his partner to have at least three of these. Therefore when an opening bid of one is made normal expectancy by the opening bidder is three taking tricks in the declared suit in his partner's hand. These three tricks are made up of the three kinds of tricks i.e. high card tricks, long suit tricks and ruffing tricks.

It must be borne in mind that, in Contract, provided there is no interference bidding, the first response by the partner of the original bidder is the vital response. In other words it is upon the first response that the success or non-success of that particular deal depends. It is, therefore, of the utmost importance that this first response be precise. In any raise by partner of the original bidder's declaration, the raise must be given in full. As normal expectancy is three taking tricks, the full raise is the number of tricks above three that the hand contains. This works out as follows:—The original bid one spade. This bid definitely informs the partnership that the bidding hand contains a minimum of from four to five taking tricks with spades trumps. The original bidder's partner decides that the spade bid fits his hand and that the deal should be played with spades trumps. The responding hand, then figures the actual trick taking probabilities of the hand with spades trumps. If the hand will take four tricks, then he raises the bid to two spades. If the hand will take five tricks he bids three spades and so on. In other words he gives raises corresponding to the number of taking tricks he has above three. The following example will explain this.

## North

Spades J. X. X. X.  
Hearts X. X.  
Diamonds A. K. X.  
Clubs K. X. X. X.

## West

Spades X. X. X.  
Hearts J. X. X. X.  
Diamonds J. X. X.

## South

Spades A. K. X. X.  
X.  
Hearts A. X. X. X.  
Diamonds X. X.  
Clubs X. X. X. X.

The Bidding.—South is the Opening Bidder

S W N E

1 Spade Pass 3 Spades Pass

4 Spades Pass Pass

In valuing North's hand the procedure is as follows:—

Half a trick for the four card spade suit.

Half a trick for the Jack of Spades.

One trick for the ability to ruff the third round of hearts.

Two tricks for the Ace, King of Diamonds.

Half a trick for the four card club suit.

Half a trick for the King of Clubs.

Or a total of five taking tricks with

TANEMURA BROS., SALMON ARM, B.C.

P.O. BOX 104

Spades trumps. Normal expectancy is three tricks. Therefore North has two raises and bids three spades.

South's hand is valued as follows:—

Two tricks for the Ace, King of Spades.

Two tricks for the five card spade suit.

One trick for the Ace of Hearts.

Or a total of five taking tricks. As North has shown five taking tricks and South has five, then North bids four spades, as the bidding has disclosed ten taking tricks in the combined hands.

The valuations which I gave you in a previous article are uncanny in their accuracy up to ten tricks. In the next article it will be shown under what circumstances they are not accurate and why. It may be said however that eighty per cent of the time they are accurate.

## Body Emits Violet Rays

Rays From Woman's Eye Destroys Yeast Cells

A woman's eye killed yeast cells simply by looking at them at Cornell University recently. This discovery, suggesting the "evil eye," but found due to an ordinarily harmless form of ultra violet rays given off by human bodies generally was reported to the American Association for the advancement of science.

The experiments were described by Dr. Otto Rahn, of the Cornell Bacteriology Department.

The yeast cells—such a tiny particle—were laid on a glass slide. The woman placed her eye close, as in looking through a microscope. The cells died in a few minutes. Previous experiments with other parts of the body explain the lethal power in this feminine look.

For several years scientists have been reporting various discoveries that living things produce ultra violet rays. In the human body they were first found coming from working muscles, though not from resting ones. Then they were found in the blood and in carcinoma, a form of cancer.

The finger tip rays of several persons at Cornell killed yeast readily. Through quartz placed above the cells, the killing required about 30 minutes; without it two to five minutes. The quartz helped to show that ultra violet was the cause. Yeast protected by ordinary glass which is impervious to ultra violet was unharmed.

After the finger, the tip of the nose was discovered to be a fine ultra violet "tube." Then came the eye.

The human rays are not always harmful. From some persons they are harmful to tiny plants. There seems to be no difference in the kind but the volume differs. When large it is lethal to yeast. The same person emits it at different rates. He may be "killing" at one period and "benign" at another.

## More Prevalent In Cities

Common Cold Flourishes Best In Crowded Centres

That colds are associated with crowded cities public health officials have long suspected. Dr. William G. Smillie of Harvard now supplies the supporting evidence. In four isolated communities colds are caught only from outsiders. Spitzbergen's case is especially impressive. The miners of that most northerly community live and sleep in damp, hot barracks, work in drafts at temperatures below freezing, but catch no cold. When Dr. Smillie concludes that the common cold must be attributed to an infection and probably to one that can never be seen under the microscope we naturally ask if there is no serum that will impart immunity. He holds out no hope. Only the asymptomatic infections may perhaps be thus controlled. The primary cold seems to be unconquerable—the price we pay for swarming in cities.

Mrs. Adam Ato Apple  
It wasn't Eve who ate the Biblical apple in the Garden of Eden. It was Mrs. Adam, Dr. H. A. Ironsides, Chicago, explained in a lecture at Fort Worth, Texas. The name Eve was conferred on her later, by Adam himself.

The active search for oil in western Canada has switched to Northern Alberta, where three test wells are planned in the Athabasca area, by Eastern interests.

## SUNDAY SCHOOL LESSON

JULY 10

## THE CALL OF MOSES

Golden Text: "Certainly I will be with thee."—Exodus 3:12.

Lesson: Exodus 3:11 to 4:30.

Devotional Reading: Isaiah 61:8.

## Explanations and Comments

Called To a Great Task, Exodus 3:10.—"The biography of great men is not confined to public events. It relates the incidents which are private, and describes the experiences which are spiritual and account for spiritual results. Thus it was with Moses; we must be with him in the wilderness in order to understand his conduct at the head of the host of Israel." At Horeb the call came to Moses to become the leader of his people, deliver them from oppression in Egypt, and bring them forth on their way to the Promised Land. He stood before a bush that burned and yet was not consumed.

"How clear is the anticipation here of what is now the accepted truth of physical science, that the energy of God, though always expended in nature and in history, is never consumed and never destroyed!"

"I have seen the affliction of my people." I am come down to deliver them. . . . Come now therefore, and I will send thee to Pharaoh, that thou mayest bring forth my people, the children of Israel out of Egypt. With a flash of insight Moses knew that God was calling him to the stupendous task of delivering his enslaved brethren in Egypt.

"The dialogue between Jehovah and Moses as in other cases, must be pictured, not as an audible externally, but as giving expression—in words which are in the mind of the hearer—to Moses' mental communings with God, through which he was gradually taught to see him, that in spite of the difficulties which he saw before him, he was nevertheless to be God's appointed agent for accomplishing Israel's deliverance."—R. R. Driver.

"God has a way of His own into the spirit which He has made. He lays His will upon man, and the man awakens to the realization that he stands summoned by that being to specific submission and definite service."

"And, as the path of duty is made plain, May grace be given that I may walk therein."

Not like the hireling for his selfish gain, But cheerful in the light around me thrown.

Walking as one to pleasant service led,

Doing God's will as if it were my own.

Yet trusting not in mine, but in his strength alone."

—Whittier.

## What Price Accident?

Borden Of Cost Falls On Just and Unjust Alike

The average citizen when he picks up the paper and reads about an automobile accident may feel a fleeting moment of sympathy for the victim, but he dismisses the incident from his mind as something that does not concern him personally. If he stopped to think, he would realize that every automobile accident involving injury or loss of life affects his pocketbook. Nearly every such accident costs for emergency hospitalization and this in turn costs money.

To this cost must be added the expense of automatic signals, court and traffic squads. Insurance rates also increase. So that any way one figures the matter out the burden of such accidents falls upon the just and the unjust alike.

In the year 1931 there were some 3,000,000 automobile accidents in the United States, with 1,000,000 people killed or injured. This is too appalling to even comment upon. The destruction of life and property in the end touches everybody's pocketbook more than the cost which the accidents involve. The sum total of all these charges should be great enough to make the people of the United States bend every effort to reduce automobile hazard.

The remedy lies solely with the people themselves.—Argonaut, San Francisco.

## NAME BRITISH DELEGATES FOR EMPIRE PARLEY

London, England.—Announcement of arrangements for at least four British cabinet ministers to attend the Imperial Economic Conference at Ottawa, in addition to Sir Philip Cunliffe-Lister, Secretary for the Colonies, who is not in the cabinet, indicated that Stanley Baldwin would lead the United Kingdom's delegation.

Mr. Baldwin is Lord President of the Council and, at the moment, acting Prime Minister. He will be accompanied by Lord Hailsham, Minister of War; J. H. Thomas, Secretary for Dominions; and Walter Runciman, President of the Board of Trade, all cabinet ministers.

The Australian and New Zealand delegations have sailed for Vancouver from Wellington, New Zealand, and arrive in the Pacific Coast city on July 15. The conference opens July 21. Stanley Melbourne Bruce, Assistant Treasurer, and H. S. Gullett, Minister of Trade, head the Australian delegation, while New Zealand's principal representatives are J. G. Coates, Minister of public works, and Downie Stewart, Finance Minister.

The first of the sections of the combined British delegations, including the commercial and industrial advisers, leave London this week. Representatives of South Africa, India, Northern Rhodesia and Northern Ireland also take their departure from London.

Reports from Dublin shed little light on the Anglo-Irish dispute that is likely to prove embarrassing at Ottawa. In announcement that President Eamon de Valera would not attend the Imperial Economic Conference because of pressure of business, it was indicated the Free State delegation at Ottawa would confine itself solely to consideration of trade questions and Dublin indicated it did not expect the larger issue of the Anglo-Irish difference to arise.

### Deportation Case

Appeal To Supreme Court Of Canada Is Delayed

Halifax, N.S.—The appeal to the supreme court of Canada on behalf of alleged Communists held here for deportation will be held up at least a week while Mr. Justice Ross, of the supreme court of Nova Scotia, considers the application for leave. When formal motion was made recently by L. A. Ryan, counsel for a group of eight of the alleged Reds, C. B. Smith, K.C., representing the crown, appeared in opposition to the appeal. His lordship continued the application for a week, and intimated that he might hear further argument from Mr. Ryan.

The condemned men sought release under habeas corpus proceedings, but their action was dismissed by a supreme court judge and later by the full bench of the Nova Scotia supreme court.

### Scalds Prove Fatal

Delegate From Vancouver Attending Orange Gathering In Montreal Dies From Injuries

Montreal, Que.—John E. Carpenter of Vancouver, died in hospital here from injuries sustained when he was scalded in his hotel bathroom. He was believed to have been overcome by a seizure while drawing water for his bath and fallen into the water. He was 75 years of age.

Mr. Carpenter was in Montreal to attend proceedings of the grand lodge of British North America, of the Orange Order. Monday he was elected deputy grand master of the Black Knights. He was a past grand master of the order in British Columbia.

### Papal Legate Visits Belfast

Belfast, Northern Ireland.—No untoward incidents marked the visit here of Cardinal Lauri, papal legate at the Eucharistic Congress. It was through a quarter mostly inhabited by Nationalists that the prelate entered Ireland's ecclesiastical capital. The route was diverted so that he would not have to pass through a Unionist district.

W. N. U. 1949

## To Tour Canada

Group Of Empire Farmers On Visit To Dominion

Quebec, Que.—"To see and to learn" might be the motto of the group of empire farmers who arrived here on the liner "Empress of Australia." They spent two days in Quebec prior to starting on a trans-Canada tour.

Thirty-seven in number and including 13 women, members of the party are all farmers or closely connected with farming, and represent the mother country, South Africa and Irish Free State. They are travelling under auspices of the British National Union accompanied by Arthur Canham, Secretary of the Union and former South African Trade Commissioner to Great Britain.

The party is composed of 12 members from all parts of South Africa, two from the Irish Free State and the remainder from England and Scotland. Among them are Daniel Crawford, former treasurer of the National Farmers' Union of England, and M. G. Viljoen, of Cape Province, South Africa, a former candidate of the Nationalist Party.

## Free State Senate Passes Oath Measure

But Bill Almost Unrecognizable On Account Of Amendments

Dublin, Ireland.—The Free State senate passed the Republican Government's bill to abolish the parliamentary oath of allegiance to the crown, but the measure has been amended so the bill is almost unrecognizable. As it stands, the abolition of the oath cannot be inserted in the constitution of the Free State.

"The government has no intention of accepting the measure in its present form," said Senator Joseph Connolly, Minister of Posts and Telegraphs. It would let the bill go to the Dail Eireann "with the results that might be expected," he added.

This means the Dail may again pass the original measure, which after 18 months would become law despite the senate. The alternative is a general election in which the Republican Government would seek a concise mandate for abolition of the oath.

## Statues On Parliament Hill

Burnishing Up Statues At Ottawa For Imperial Conference

Ottawa, Ont.—Relieved of their mantles of green corrosion, statues on Parliament Hill of Queen Victoria and Sir John A. Macdonald will greet delegates to the Imperial Conference resplendent in experimental coats of varnish.

After months of work, national research council chemists prepared a solution to remove the marring corrosion. The varnish was applied in an attempt to prevent its recurrence.

## Opposition For Bracken

May Be Three-Cornered Fight At The Pas

Winnipeg, Man.—Premier John Bracken may have two opponents in the deferred election in The Pas on July 14. J. A. Campbell, Conservative, is to be nominated as a candidate for the seat and the Independent Labor Party moved to place a third man in the field. Rupert's Land also will elect a member on July 14. H. G. Beresford, government member in the last House, will run as a Bracken follower and probably will be opposed by Col. Arthur Sullivan, Winnipeg lawyer.

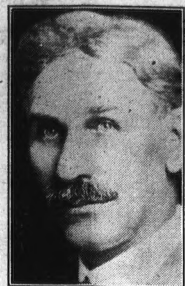

### New Plans For India

London, England.—A comprehensive scheme for the future constitution of India, embodying both the aspects of federation and provincial autonomy, will be presented in a bill to be brought down in parliament by the British Government. Sir Samuel Hoare, Secretary for India, announced.

### Sets Flight Record

Vancouver, B.C.—Making the flight from Winnipeg to Vancouver in one day, Pat Reid, noted Canadian pilot, landed at Sea Island airport. He stopped at Regina, Lethbridge and Grand Forks en route, and averaged 100 miles an hour.

## DONS OVERALLS

Hon. Peter Heenan, former Liberal Minister of Labor, is going back to overalls as a locomotive driver and hopes to take the throttle this week. "It is my trade, and a good one," he said. "Besides, I have a family to support."

## Under New Regime

United Newfoundland Party Takes Over Reins Of Office

St. John's, Nfld.—This island dominion is now under control of the United Newfoundland party, with F. C. Alderdice, prominent St. John's business executive as prime minister.

The Liberal administration of Sir Richard A. Squires, unseated at the general elections of June 11, has resigned, and members of the new government were sworn in. Mr. Alderdice also took the portfolio of Minister of Finance and Customs.

Other members of the executive council are: J. C. Puddester, Secretary of State; L. E. Emerson, K.C., Minister of Justice; H. A. Winter, K.C., James Avey, Hon. F. McNamara, S. J. Foote, Harold Mitchell, John Stone.

## An Important Judgment

Ottawa Lumberman Awarded Full Amount Of Claim Against Brokers

Toronto, Ont.—In a judgment of far-reaching importance to brokerage houses D. B. Rochester, Ottawa lumberman, is awarded the full amount of his claim, \$162,168.38, against I. W. C. Solloway, Harvey Mills and the Solloway-Mills Brokerage Company by O. E. Lennox, assistant master at Osgoode Hall.

Rochester, who dealt with the brokerage firm for more than two years, by this judgment, returned every dollar he ever invested with Solloway, Mills and Co. He is also allowed interest at five per cent. from December 19, 1929.

## Duce Escort to a Queen

Il Duce is shown with Queen Helena of Italy, on one of the very rare occasions on which they have been photographed together. The picture was made during the recent services to commemorate the fiftieth anniversary of Garibaldi's death in Rome. A monument to the wife of the national hero was unveiled at the Gianicolo as a feature of the celebrations.

## Crop Conditions

Improvement In Western Provinces Is Indicated In Government Report

Ottawa, Ont.—Canadian crop conditions are much improved in the western provinces and distinctly lower in the maritimes and eastern Canada, as compared with last year. This statement is made in the government report on crop conditions issued June 28.

Western crops have maintained their condition fairly well, the report states, in a period of spotty rainfall and higher temperature. Likelihood of heavy damage from cutworms is now past but grasshoppers are still dangerous and are particularly damaging in Manitoba.

In some large areas rain is needed to prevent crop deterioration, but generally the present moisture supplies are satisfactory.

In British Columbia, recent weather has been almost ideal with plenty of heat and rain. Haying is nearly completed. Cereal crops are looking fine.

## Prospectors Use 'Plane

'Flying Box-Car' Carries Equipment To Northern Gold Fields

Lac Du Bonnet, Man.—Prospecting in Manitoba entered upon a new phase when ten prospectors with 6,000 pounds of supplies, equipment and five canoes, left here in one aeroplane for the Island Lake gold field, 200 miles north and on the Manitoba-Ontario Boundary.

Their sky chariot was the huge Junkers of the Canadian Airways, the "Flying Box-Car."

The machine was chartered by the Manitoba Chamber of Mines with the result that the ten prospectors can get into the field at a cost of about \$60 each, including equipment.

## Send Up Test Balloons

Altitude Of 65,000 Feet Is Attained In German Experiment

Stuttgart, Germany.—Three test balloons carrying measuring instruments were sent up 65,000 feet under the direction of Prof. Erich Regener, of the Technical University. The altitude was greater than that attained last year by Prof. August Picard in his ascension to the stratosphere.

Each balloon was 6½ feet in diameter and the three were hitched together 13 feet apart with the instruments in a gondola between them. They were hauled down after three hours.

### Will Keep Present System

Calgary, Alberta.—Alberta wheat pool will continue operating this summer under its present marketing system. Pool officials decided not to hold a plebiscite this year among its membership "on alternate methods of marketing," the announcement said.

## FARM MARKETING BOARD MAY BE APPOINTED SOON

Ottawa, Ont.—A commission to study and report on the feasibility of a farm marketing board will be appointed by the Dominion Government in a few days it was learned here. It is reported that during his recent visit to the west Hon. Robert Weir, Minister of Agriculture, went into the matter with western producers and dealers and that considerable progress has been made towards reaching a decision as to the men who should form the commission.

It is planned that the commission would begin very soon to study the situation in order to be in a position to discuss the feasibility of a marketing board with exporters from other dominions who will be here for the Imperial Conference. The object of a board would be to avoid slumps in prices whenever Canada went on an export basis on such products as butter, bacon and other commodities in which the exportable surplus is small compared with the domestic demand.

## Judgment Reserved

Supreme Court Deals With Peter Veregin Case

Ottawa, Ont.—Judgment was reserved in the supreme court of Canada on the application of Peter Veregin, imprisoned leader of the Doukhobors of western Canada, for leave to appeal against a conviction in Saskatchewan for perjury.

William J. Green, Ottawa, counsel for the Province of Saskatchewan, appeared for the crown. Veregin was represented by P. G. Makaroff, Saskatoon.

With a number of clashes between opposing counsel largely on points of law, arguments centred on proceedings at the trial of Veregin in the king's bench court of Saskatchewan. After a jury trial, Veregin was found guilty in the king's bench division and was given a term of three years in Prince Albert penitentiary. On appeal to the appeal court, the sentence was reduced to 18 months.

## Staging Wrigley Swim At Lake Waskesiu

All Entrants In Saskatchewan Event Must Be Amateurs

Saskatoon, Sask.—Permission has been granted to the Prince Albert Aquatic Club to stage the Saskatchewan Wrigley one-mile championship swims at Lake Waskesiu, Prince Albert National Park, Saturday, July 16.

In 1931 the Wm. Wrigley, Jr. Company, of Winnipeg, presented for annual competition two large challenge trophies for the men's and women's provincial mile swimming championships. Two members of the Moose Jaw Aquatic Club, Percy Reynolds and Phyllis Dewar were the 1931 winners.

All entrants must be amateurs and should apply to William Schon, of the Saskatchewan pool elevators, Prince Albert, for entry forms.

## Heavy Penalty For Fraud

Five Employees Of Stores In Moscow Sentenced To Death

Moscow, Russia.—Five employees of Moscow's state retail stores were sentenced to death after a six-day trial on charges of defrauding the state of 1,000,000 rubles (nominally \$500,000) by theft, illegal raising of prices and by supplying speculators. Seven others were sentenced to ten years in prison and eight were sent to jail for three to five years. Three other defendants were acquitted.

### Printing Jobs Go Abroad

London, Ont.—Charging that \$80,000,000 worth of printing for Canadian firms was done outside Canada in 1931, the Ontario-Quebec Conference of Typographical Unions trained its guns against this alleged condition. They will ask the Canadian Manufacturers' Association and other employing organizations to condemn the practice. The printing for some companies was done in countries as far away as Sweden, it was claimed.

## The Stony Plain Golf Club's Big "Knockout" Tournament.

The Stony Plain Golf Club announce a "Knockout" Tournament to commence immediately. Competitors will communicate with their opponent as soon as possible and arrange to play 18 holes, the score for same to be handed in to Secretary. The loser will drop out, and winners are requested to watch Bulletin board for their next opponent.

The Executive Committee has arranged a handicap for each competitor based on previous scores and they would like each member to assist in arriving at a more accurate handicap, if necessary, for future competitions.

The women's finalist will meet the men's finalist for the Championship, the winner to be awarded a trophy, which will be held until next Tournament.

The figure after each of the following names indicates the score to be subtracted (or added) to the score for 6 holes, e.g., a person whose handicap is -10 will deduct 30 strokes from total score for 18 holes. This deduction will be done by the Executive. List—

Players will kindly observe following rules:

1. Do not play into those ahead of you.
2. Replace flags.
3. Green Smoothers must be left at far end of green.
4. When ball is out of bounds, remove to fairway with penalty of 1 stroke.
5. Ball must be left where it lies unless it lies (a) in a gopher hole; (b) wagon rut; and in such cases can be removed without penalty.

Any others wishing to take part in the Tournament may do so by having their names added to the list.

### Schedule of Mails.

To the East—Every day except Sunday; train No. 2, at 6:18.  
From the East—Every day except Mon.; train No. 1, at 24:16.  
To West—Sun, Tues. & Friday train No. 1, at 24:16.  
From West—Mon., Wed. & Friday train No. 2, at 6:18.  
Reg. for the East, Mon. Wed. and Friday.  
Reg. for the West, Sun., Tues. & Thurs.  
Mail should be posted before 10 p.m. for dispatch to both Trains No. 1 & No. 2.

### GLYCERIN MIX REMOVES CAUSE OF STOMACH GAS

Simple glycerin, buckthorn bark, saline, etc., as mixed in Adlerika, acts on BOTH upper and lower bowel, removing poisons you never thought were there and which caused gas and other stomach trouble. Just ONE spoonful relieves GAS, sour stomach, sick headache and constipation. Don't take medicine which cleans only PART of bowels, but let Adlerika give you a REAL cleaning and see how good you feel! It will surprise you! J. F. CLARKE, Drug-gist.

The places of business in Stony Plain will close at 1 p.m. on Wednesdays.

### Some Chiseling.

The story of how a La Salle salesman chiseled an order for a new sedan is going the rounds. This salesman had a prospect who agreed to buy a car if it would go in his garage. It was discovered that the car was 8" too long. Did the salesman quit? No. He got a man from his service department and they found by cutting thru 8" of concrete at the rear of the garage the La Salle fitted. The sale was made.

## Where Four Centuries Meet

Uniting the sixteenth and twentieth centuries as typified in the lower left hand and the upper right hand corners of this group, stands the lordly Manoir Richelieu, the fashionable holiday resort at Murray Bay on the north shore of the St. Lawrence and the site of the activities of the "One Hundred Associates" of New France. The Casino, shown at the upper left, designed after the famous Chateau de Rameau built in Montreal in 1705, now houses one of the most complete sound and talking picture installations on this continent.

Acoustic engineers of the Northern Electric Company have been working for some time with engineers of the Canada Steamship Lines, to effect the necessary treatment for the perfect reproduction of the best products of the moving picture studios, thus affording visitors to the Manoir Richelieu still another addition to the many attractions of this famous pleasure paradise.

### Farmers to Save on Their Binder Twine.

A consignment of binder twine manufactured in Great Britain for the United Grain Growers has been ordered shipped to Saskatoon via the Churchill route, in has been announced by R S Law, president of the United Grain Growers Co. Price of twine has declined this season to the lowest level in many years, Mr. Law noted. He said on an average through the West prices will be approximately three and one-third cents lower than last year. Mr. Law estimated that the savings to farmers would amount to \$2,500,000. Farmers will probably pay 8 to 9c a lb. for twine, compared with 15c 2 years ago, and as high as 26c during the war.

### Reducing Salaries of Teachers

A meeting of Red Deer School Board was held recently, to consider the question of salaries to be paid during the school year which commences Sept. 1. At the end of a lengthy session the following reductions from the 1931-32 salaries were agreed upon: High School Principal, Whitman \$200, other members of high school staff \$100; Public school principal \$100, other public school teachers \$50. A reduction will also be made in the caretakers' salaries.

### "Bill," the \$5000 Pig.

Two years ago a Tennessee farmer bought a small Poland-China porker for \$3.65, with the intention of selling it after fattening it. But the farmer's children made a pet of "Bill" who refused to fatten and merely continued to grow. Bill now weighs 1540 lbs. 8 feet 4 in. long, and is 4 feet high. Bill's owner charges admission to see him, and in one month 7000 people viewed the monster. The farmer has refused \$5000 for the animal and expects soon to get an offer of \$10 000.

## Bright Bank Community Picnic and Dance, Friday, July the Eighth.

## VACATION TIME

## "YES, I AM 40 YEARS OLD!"

says Irene Rich

"YES, I am 40 years old. I don't mind confessing it a bit," says Irene Rich, "and I have two grown daughters of whom I am very proud. A screen star never worries about birthdays, you know."

But, in Hollywood, they guard complexion beauty above all else. They know it says youth quicker than anything else.

How does this lovely star guard complexion beauty? Just as so many other Hollywood actresses do—she of the 694 important ones! "I have used Lux Toilet Soap regularly for years," she says, "and am very grateful for it."

Surely you will want to try this

fragrant, white soap. The career of

dollar-a-cake French soap for 10c.

IRENE RICH and her two daughters (left to right) Frances, twenty-one, and Jane (in background), fifteen, their mother, actually still (above). One of Miss Rich's recent photographs.

## THE HOUSE OF DREAMS-COME-TRUE

— BY —

MARGARET PEDLER

Author of "The Splendid Polly," "The Herald of Far East," "Hodder & Stoughton, Ltd., London."

### CHAPTER XXIV—Continued.

Once more the curtain had fallen, and, to the hum of conversation suddenly released, the lights flashed up into being again over the auditorium. Simultaneously the door of Lady Anne's box was opened from the corridor outside.

"May I come in?" said a voice—a pleasant voice with a gay infection of laughter running through it as though its owner were quite sure of his welcome—and Burke, big and striking-looking in his immaculate evening kit, his ruddy hair flaming wickedly under the electric lights, stroiled into the box.

He shook hands all round, his glance slightly quizzical as it met Jean's, and then Lady Anne presented him to the Comtesse de Varigny.

At almost seemed as though something, some mutual recognition of a kindred spirit, flashed from the warm southern-dark eyes to the fiery red-brown ones, and when, a minute or two later, Burke established himself in the seat next to Jean, vacated by Nick, he murmured in a low tone:

"Where did you find that Eastern-looking charmer? I feel convinced I could lose my heart to her without any effort."

Jean could hardly refrain from smiling. This was her first meeting with Burke since the occasion of the scene which had occurred between them in the little parlour at the "honeymooners' inn," and now he met her with a frank friendliness of gaze, nothing in the world, other than of a mutually pleasing and amicable nature, had

Touchy, irritable! Everything upsets her. She needs Lydia E. Pinkham's Vegetable Compound to soothe her nerves and build up her health by its tonic action.

W. N. U. 1946

taken place. It was so exactly like Burke, she reflected helplessly. "Then you had better go and make love to her," she suggested. "There happens to be a husband in the background—a little hypochondriac with quite charming manners—but I don't suppose you would consider that any obstacle."

"None," retorted Burke placidly. "I'm quite certain she can't be in love with him. Her taste would be more—robust, I should say. Where is she stopping?"

"At Claridge's. We met her there this evening. I knew her in Switzerland."

"Well, you shall all come out to supper with me tomorrow—the Countess included."

Jean shook her head demurely. "We shall all be back at Staple tomorrow—the Countess excepted. You can take her."

"Then the supper must be tonight," replied Burke serenely.

"What are you doing in town, anyway?" asked Jean. "Is Judith with you?"

"No. Came up to see my tailor"—laconically.

"He crossed the box to arrange matters with Lady Anne, and before the curtain rose on the last act it was settled that they should all have supper together after the play."

Later, when Burke had once more resumed his seat next Jean, Madame de Varigny, whose hearing, like her other senses, was preternaturally acute, caught a whispered plaint breathed into Nick's ear by Lady Anne.

"Now isn't that provoking, Nick darling? Why on earth need Geoffrey Burke have turned up in town on our last evening? I was hoping, later on, if you and I were very discreet and effaced ourselves—that Blaise and Jean might settle things."

Madame de Varigny's eyes remained fixed upon the stage. There was no change in their expression to indicate that Lady Anne's plaintive murmur had at that moment supplied her with the key of the whole situation as it lay between Jean and the two men who were sitting one each side of her.

But the following evening, when the Staple party having left town, she and Burke were dining alone together at a little restaurant in Soho, the knowledge she had gleaned bore fruit.

Burke never quite knew what impulse it was that had prompted him, as he made his farewells after the supper-party, to murmur in Madame de Varigny's ear, "Dine with me tomorrow night." It was as though the dark mysterious eyes had spoken to him, compelling him to some sort of friendly overture which the shortness of his acquaintance with their owner would not normally have inspired.

It was not until the coffee and cigarette stage of the little dinner had been reached that Madame de Varigny suddenly shot her dart.

"So you came all the way up from this place, Combe—Coombe Eavies?—to see Mees Peterson, and hey, presto! She vanishes the next morning!"

Burke stared at her almost ruddy. The woman's perspicacity annoyed him.

"I came up to see my tailor," he replied curtly.

"Mais parfaitement!" she laughed—low, melodious laughter, tinged with a frank friendliness of amusement which somehow smoothed away Burke's annoyance at her shrewd summing up of the situation. "To see your tailor. 'Naturellement!' But you were not sorry to encounter Mees Peterson also, hein? You enjoyed that?"

Burke's eyes gleamed at her.

"Do you think a dog enjoys looking at the bone that's out of reach?" he said bluntly.

"And is Mees Peterson, then, out of your reach? Me, I do not think so." Burke was moved to sudden candour.

"She might not be, if it were not that there is another man—"

"Co Monsieur Tor-ma-rin?"

"Yes, confound him!"

"He'll—with a long-drawn inflection compact of gentle irony. "You should be able to win against this Monsieur Tor-ma-rin. I think regarding him intently—"I think you will win."

Burke shook his head gloomily.

"He had first intimacies. He met her abroad—somewhere—rescued her in the snow or something. That rescuing

**You said it!**

stunt always pays with a woman. All I did"—with a short, harsh laugh—"was nearly to break her neck for not driving with me one day recently!"

"Is she engaged to Monsieur Tormarin?" asked Madame de Varigny quickly.

"No. Luckily, there's some old affair in the past holds him back."

She nodded.

"You shall marry her," she declared with conviction. "See, Monsieur Bewrke—"ais, ais, quel nom!"

"I am 'clairvoyante, propheteuse,' and I tell you that you will marry this little brown Jean."

Her foreign accent strengthened with her increasing emphasis.

Burke looked dubious.

"I'm afraid your clairvoyance will fail this journey, madame. She'll probably marry Tormarin—unless"—his eyes glinted—"I carry her off by force."

Madame de Varigny shook her head emphatically.

"But not I do not see it like that. 'Eh bien!' If she become fiancée—"

"engaged to him—you shall come to me, and I will tell you how to make sure that she shall not marry him."

"Tell me now!"

"Non, non! Win her your own way. Only if you do not succeed, if Monsieur Tormarin wins her—why, then, come to visit me at Chateau Varigny."

That night a letter written in the Comtesse de Varigny's flowing foreign handwriting sped on its way to France.

"Matters work towards completion," it ran. "My visit here has changed 'bien a propos.' There is another would-be lover beside Blaise Tormarin. I have urged him on to win her if he can, for if I have not wrongly estimated Monsieur Tormar-

in—and I do not think I have—of the type to become deeply in love and less able to master his feelings if he realizes that he has a rival. At present he refrains from declaring himself. The opposition of a rival will probably drive him into a declaration very speedily. When the dog sees the bone about to be taken from him—he snaps! So I encourage this red-headed lion of a man, Monsieur Burke, to pursue his 'affaire du coeur' with vigour. For if Blaise Tormarin becomes actually betrothed to Mademoiselle Peterson, it will make his punishment the more complete. I pray the God of Justice that it may not now be long delayed!"

(To Be Continued.)

All Night With Asthma. Everyone knows how attacks of asthma often keep their victims awake the whole night long. Morning finds him wholly unrefreshed for a day of business, and yet, business must still be carried through. All this night suffering and lack of rest can be avoided by the prompt use of Dr. J. D. Kellogg's Asthma Remedy, which positively does drive away the attacks.

### Rich Gold Strike

Two Prospectors Find Wealth In Nuka Bay, Alaska

Reports of a fresh gold strike in the Nuka Bay district, 60 miles southwest of Seward, Alaska, were brought in by two prospectors who displayed a fifteen-pound sample of gold grains estimated to assay \$50,000 a ton.

The strike was made by Dave Downey and Tom Babcock, and the specimen was declared by veteran prospectors to be the richest ever taken from the district.

The cheapness of Mother Graves' Worm Exterminator puts it within reach of all, and it can be got at any drugstore.

### Not a Bad Definition

Robert Quillen in his private newspaper which he publishes "for his own amusement and the entertainment of his friends" defines "Radio" thus: his friends' "Radio" thus: "An expensive instrument you place in your home so some ass can talk to you about toothpaste."

In Saskatchewan, south of approximately latitude 53, enough food is produced to support a population of 6,000,000.

### Little Helps For This Week

"It is God that girdeth me with strength, and maketh my way perfect."—Psalm xviii, 32.

Even as a nurse, whose child's imperfect pace

Can hardly lead his foot from place to place,

Leaves her fond kissing, sets him down to go,

Nor does uphold him for a step or two;

But when she finds that he begins to fall,

She holds him up and kisses him withal;

So God from man sometimes withdraws His hand

Awheel to teach His infant faith to stand;

But when He sees his feeble strength begin

To fail, He gently takes him up again.—Quines.

When the babe puts his little soft hand into yours, his hand is as strong as yours, since it is yours that guides it; so, when we put our hand into God's, we are by His grace as strong as He is, since He leads, and we only follow.—Henry Ward Beecher.

Keep your stock free from blemish with Douglas' Egyptian Liniment. Removes inflammation, quickly relieves bruises, sprains, strains, swellings, contraction of cords, stiffness of joints, and sore muscles.

### Forecast Big Crop

The Lethbridge Herald says forecasters are already putting the Alberta wheat crop this year at 150,000,000. It's a long way to August 20, when cutting may be expected to commence, and many things may happen. However, if the price outlook were as bright as the yield prospects we would all be happy.

A \$250,000-hotel is being built at Edmonton, Alberta.

## Stony Plain and District

Mr and Mrs Franklyn K. Clarke, of Jasper, visited this week at the home of Mr and Mrs J F Clarke.

Mr and Mrs Duborski and family arrived in Stony Plain on Friday, and are staying with Mr and Mrs Reiser.

Miss Myrtle Sinner is making a good recovery from a major operation she underwent last week in an Edmonton hospital.

Mr and Mrs A E Michael and family moved out to their Edmonton Beach cottage on Friday.

Mr Neil Sutherland, Edmonton, was a holiday visitor with Mr R Wood.

Miss Queenie Donaldson arrived home on Saturday from Kinsau, where she had been teaching.

Among the visitors in town this week were Rev Philip and Mrs Unterschultz, Rochester; Rev B F and Mrs Beards, Beaver Hills; Ralph Witherspoon, Fairview.

Jack McGillis, Stony's popular sportsman, arrived back in town on Friday.

His Excellency Archbishop O'Leary will administer confirmation at St. Philip's church Sunday July 16.

Having finished their teachers' duties at the Clairmont Public school, Miss Catherine Alt and her brother Phil are said to be making their way down to Stony by motor.

The Walther League Camp at Edmonton Beach opened this week, with Rev H C Boettcher in charge.

The Athletic club at Bright Bank has arranged for its annual picnic, to be held on the School grounds, Friday, July 22d.

## News of Baseball.

Stony's baseball team journeyed to Wildwood on Monday, July 4th, and participated in the tournament there. They won their games by big scores—the last game running 11 to 2 in their favor.

Stony's ball tossers played a Hudson Bay team on the local diamond Sat. Evg. and won—2 runs to 0. Stony's battery, Ed Enders & Sinner.

The Onoway baseball team played on the local diamond with a Stony team Thursday night, and won the game—4 to 3.

Stony's team played up at Onoway last evening; the results of the game are not available as we go to press.

Stony's ball players intended participating in the sports up at Onoway yesterday, but were prevented by the rain storm.

## Accident Near the Grove.

While motoring home to Edmonton from the Beach on Sunday evening last, Miss Marjorie Brown had the misfortune to have her car overturn while going thru the dip at the R C. Church, on the Highway east of the Grove. Miss Brown was removed in an ambulance to the Royal Alexandra hospital, where it was found she was suffering from scalp wounds, but her condition was not considered serious. The car was hailed to Dave Bell's hospital.

## Spruce Grove News.

Miss E Pöetzsch, who had been studying at the Lutheran College, in Saskatoon, arrived home on Monday evening last, for summer vacation.

Mr Walther Brox, accompanied by The Duke, were present at the Sand Hills picnic on Monday.

Mr Chis, Schlang motored Herman Loblich to South Cooking Lake on Dominion Day.

Mr J F Forbes arrived from Jasper on Monday, where he had spent a short vacation, fishing at Maligne lake.

Capt. E. K. Gibson with a party of Boy Scouts, are having a vacation at Jasper this week.

Mr Wilbur Sutherland, who has been teaching at Ponoka, and Mr Alvin Sutherland, a teacher from Westlock, are both home for the summer vacation.

Mr D Bell has had another gasoline pump installed, for the convenience of his customers. Dave says his gasoline sales have doubled within the past month.

Hauling of grain to local elevators has fallen off considerably since the payment of the wheat bonus was withdrawn.

The Grove ball team has had a quiet spell lately, but will come into action again on the 13th, when Stony's team meets them on the Groves' diamond.

The specials at the Curtis Restaurant on The Fourth were mince tarts and cross-bar apricot pies.

Pete Olinuk, the young man who was run over by an oil truck near the Grove Thurs. Evg., after he toppled from his bicycle, is now recovering at the Misericordia hospital from his injuries. He was taken to the City in the Howard & McBride's ambulance.

The Misericordia at Peace Lutheran church, at Spruce Grove, will be held Sunday next, July 10. Rev H Kuring pastor.

Spruce Grove Councillors held a meeting on Monday in Municipal hall, with Reeve McLaughlin in the chair. At the intermission the Councillors adjourned to the Curtis Restaurant, where fried chicken and mince pie were on the program.

## A Job for the New Preacher

"Do you take any periodicals?" asked the new minister at his first round of parish visits.

"Well, I don't myself," replied the lady, "but my husband takes 'em frequently. I do wish you could get him to sign the pledge."

## John Leslie Retires

1. John Leslie. 2. E. E. Lloyd. 3. L. B. Uwin. 4. E. A. Leslie.

John Leslie, Vice President of Finance and Treasurer of the Canadian Pacific Railway, after more than 38 years of service with that Company and its subsidiaries will retire from office under pension rules, on July 1st, according to an announcement made by E. W. Beatty, Chairman and President. Mr. Leslie will be succeeded by Mr. E. E. Lloyd, presently Comptroller of the Company. L. B. Uwin, Assistant Comptroller, will be appointed Comptroller and E. A. Leslie, Assistant Comptroller, will be appointed Deputy Comptroller. The Directors and myself desire to record our appreciation of Mr. Leslie's long, loyal and efficient service," Mr. Beatty said in announcing Mr. Leslie's retirement. Mr. Leslie has given a lifetime to railway work in this country. He became a railroader as a boy of 16, when in March, 1877 he entered the service of the Toronto Grey & Bruce Railway, as a junior

clerk in their Toronto office. He became Vice President and Comptroller, Montreal in January 1923, and Vice President in charge of Finance, and Treasurer on February 10th, 1924. Mr. Lloyd, who succeeds Mr. Leslie as Vice President and Treasurer commenced his railroad career with the Canadian Pacific at Winnipeg in December, 1887, when he became a clerk in the Stores Department. He became Auditor of Stores & Mechanical Accounts at Montreal, in December, 1904, and after holding different posts in that department, became Auditor of Disbursements in March 1918; Assistant Comptroller in February 1921, and Comptroller in February 1923. Mr. Uwin, who succeeds Mr. Lloyd, was first a clerk in the office of the Assistant Superintendent at Chapeau, Ontario, in 1908 and served at Chapeau, White River and Schreiber until the out-

break of the world war. He early answered the call to arms by enlisting in the first Contingent. Mr. Uwin was awarded the Military Cross, earned his nationality, being demobilized with that rank in April, 1919. On July 2, 1923, he was made Assistant Auditor of Miscellaneous Accounts, and on February 10th, 1924, he was appointed Assistant Comptroller.

Mr. A. Leslie, who becomes Deputy Comptroller is a son of John Leslie, and followed his distinguished father into the service of the Canadian Pacific Railway Company. In 1912 he succeeded in winning a Canadian Pacific scholarship at McGill University, and became a student of transportation. He graduated in 1916 with a bachelor of science degree. Mr. Leslie immediately enlisted with the Canadian Artillery, and after serving in England and in France, was demobilized in May 1919 with the rank of Lieutenant. July of the same year found him back in harness with the Canadian Pacific as clerk in the General Managers' office in Montreal. Mr. Leslie was promoted to the post of Assistant Comptroller in February, 1923.

## Sunday's Victim Known Here

Helmuth Viemeyer, victim of the accident on the Highway near Wabamun, Sunday, was a former resident of this district, having lived on a farm two miles south of Comet school with his parents. The family moved to Edgerton district in 1918, where they still reside. Their former farm at Comet is now occupied by John Eichenlaub.
